

The LionRock Fellowship

About Us

LionRock Capital is a single family office based in Singapore. We adopt an endowment style model for the consistent and steady growth of our portfolio. We compound our capital by investing in the highest quality franchises, management teams and funds that are pursuing large and structural growth opportunities. LionRock's portfolio is invested globally and comprises direct investments in public markets and fund and direct investments in private markets. We believe that a long term orientation is key to compounding capital, and accordingly, each investment is held for multiple years. Our CEO is hands-on and has 30 years of investing experience. Our employees have been with us for an average of 11 years each.

The LionRock Fellowship is a fully remote, part-time independent study program offering university students with the opportunity to research industry areas and stock ideas with the mentorship and guidance of finance professionals at LionRock.
